

Zahra Hanifi

Frontend Engineer | Fintech & Real-Time Trading Platforms

+98 935 420 6403 | zahrahanifi98@gmail.com | Tehran, Iran (Open to Remote) | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 6+ years shipping performant, scalable web applications, including 3+ years building real-time trading and fintech products at a crypto exchange. Deep expertise in Vue.js/Nuxt.js, WebSocket-driven trading interfaces, and design systems, paired with a track record of owning initiatives end-to-end — from cross-functional product launches to platform-wide reliability fixes — well beyond the usual scope of a frontend role. Now expanding into React and Next.js, building projects in the stack and open to roles that put it to work.

KEY ACHIEVEMENTS

- › **Cross-functional ownership:** led a product-adoption campaign for the platform's leverage product end-to-end, coordinating directly with content and social teams outside the usual frontend scope — driving measurable growth in adoption and new active users.
- › **Performance fix at scale:** diagnosed and resolved a memory leak on the trading page caused by event listeners that weren't being cleaned up, reducing memory growth over long sessions and eliminating the resulting crashes and freezes.
- › **Design system leadership:** built and rolled out a platform-wide Design Language System, meaningfully reducing UI-build time for new features.

CORE SKILLS

- › **Core:** JavaScript, TypeScript, Vue.js 2/3, Nuxt.js, React, Next.js, React Router, Quasar, Vuetify
- › **Styling:** Tailwind CSS, Sass, HTML5, CSS3
- › **State Management:** Pinia, Vuex, Redux
- › **Tooling & Infrastructure:** Vite, Webpack, Git, GitLab, Strapi CMS, SSR/SSG, Azure
- › **Domain Expertise:** Real-time trading systems (WebSocket), TradingView chart integration, Design Systems, Core Web Vitals & performance optimization
- › **Languages:** Persian (Native), English (Intermediate)

PROFESSIONAL EXPERIENCE

Frontend Developer — TABDEAL Exchange

Mar 2023 – Present

- › Owned a cross-functional adoption campaign for the platform's leverage product end-to-end — designing in-app promotion touchpoints and coordinating with content and social media teams on external messaging; contributed to measurable growth in product adoption.
- › Diagnosed and fixed a memory leak on the trading page caused by event listeners that weren't being cleaned up on unmount, cutting memory growth during extended sessions and eliminating the crashes and freezes it had been causing.
- › Built and later redesigned major trading products from zero to production — Margin & Easy Leverage, Gold (including a full page redesign), and Fixed Income — owning UI architecture, state management, and integration with real-time trading logic.
- › Designed and implemented an extensive, themeable Design Language System (DLS) with reusable components, improving UI consistency and developer velocity across the product.
- › Integrated and maintained TradingView charts (version upgrades, performance tuning, order book depth visualization, SL/TP overlays) and implemented WebSocket-based real-time interfaces for live pricing and order-book synchronization.
- › Currently developing a call-center CRM panel in React/Next.js, responsible for adding and maintaining users' product information — an ongoing project alongside the core Vue/Nuxt trading platform work.

Technologies: JavaScript, Vue, Nuxt, React, Next.js, React Router, Redux, Vuetify, Pinia, Vuex, Tailwind, Sass, Webpack, Strapi Headless CMS, SSR, SSG

Frontend Developer — ERNYKA Group

Sep 2022 – Mar 2023

- › Developed responsive face-detection and authentication panels, enhancing accessibility with reusable components.
- › Integrated WebSocket to fetch and display live camera feeds, enabling real-time monitoring.

Frontend Developer — Sarvehana

Feb 2020 – Sep 2022

- › Built and maintained PWA mobile apps using Ionic and Quasar, integrating cloud-based services via Microsoft Azure.

Web Developer — Netdes

Sep 2019 – Sep 2020

- › Developed responsive WordPress-based websites and optimized SEO rankings.

EDUCATION

B.Sc. in Computer Engineering

Semnan University, Semnan, Iran
